1. Correlation & Causality

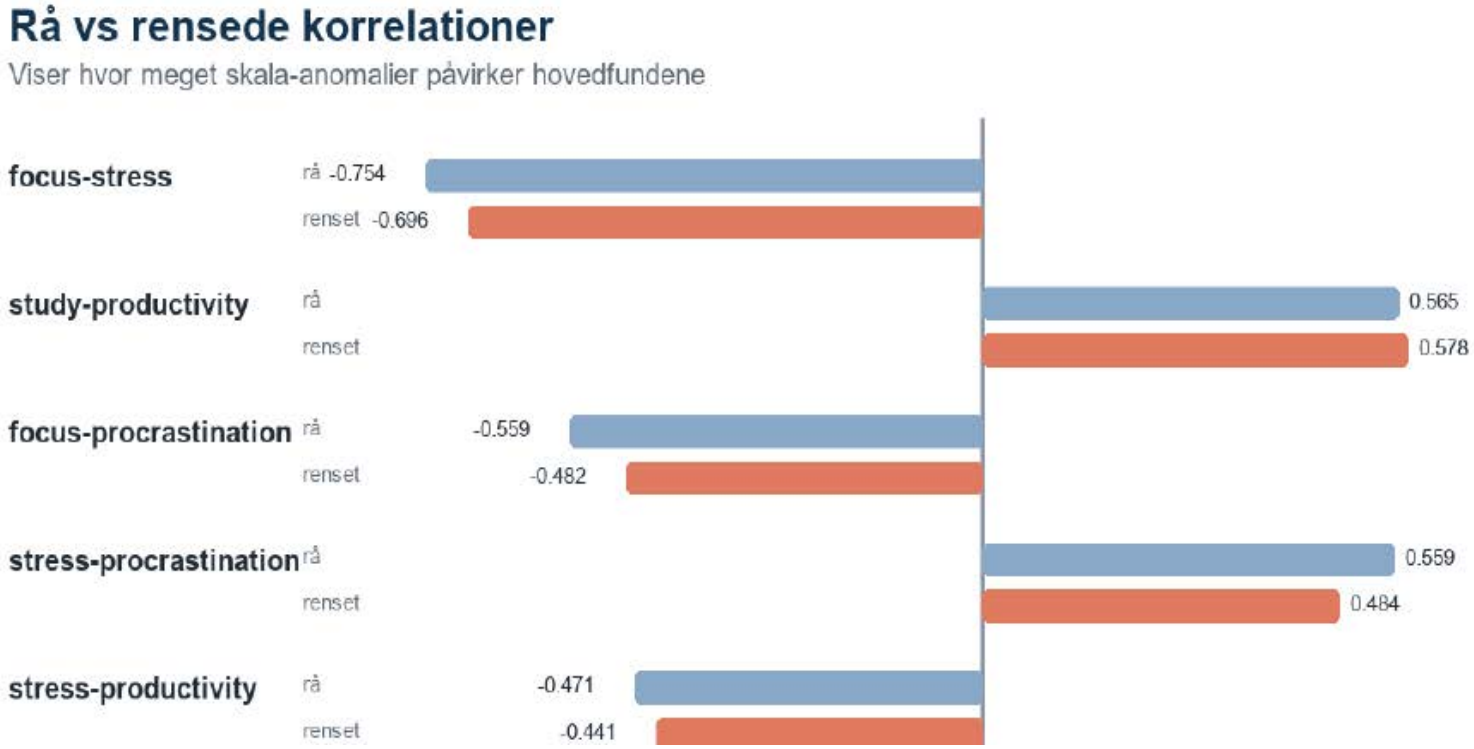

Nøgleresultat	Værdi
Renset antal observationer	1787
Fjernet pga. focus_score uden for 1-10	213
Fjernet pga. stress_level uden for 1-10	6
focus_score vs stress_level	-0.696
study_hours vs motivation_level	0.598
study_hours vs productivity_score	0.578

Rå vs renset	Rå r	Renset r
focus - stress	-0.754	-0.696
focus - procrastination	-0.559	-0.482
stress - procrastination	0.559	0.484
stress - productivity	-0.471	-0.441

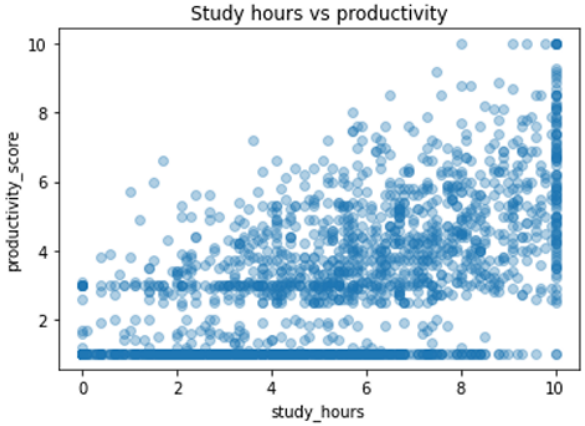

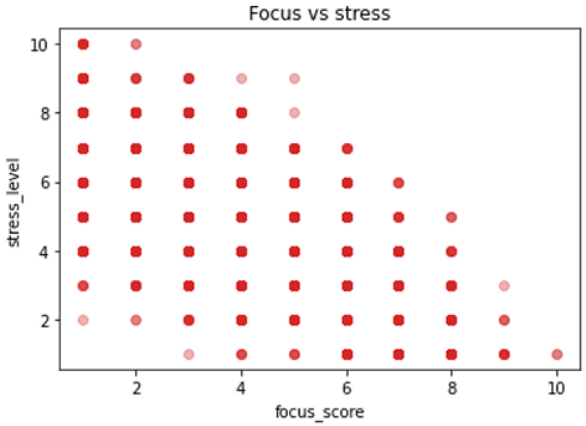

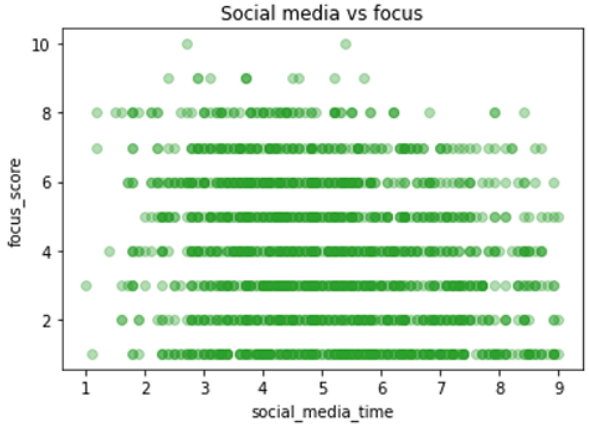

1. Correlation & Causality, figurer

1. Correlation & Causality, figurer

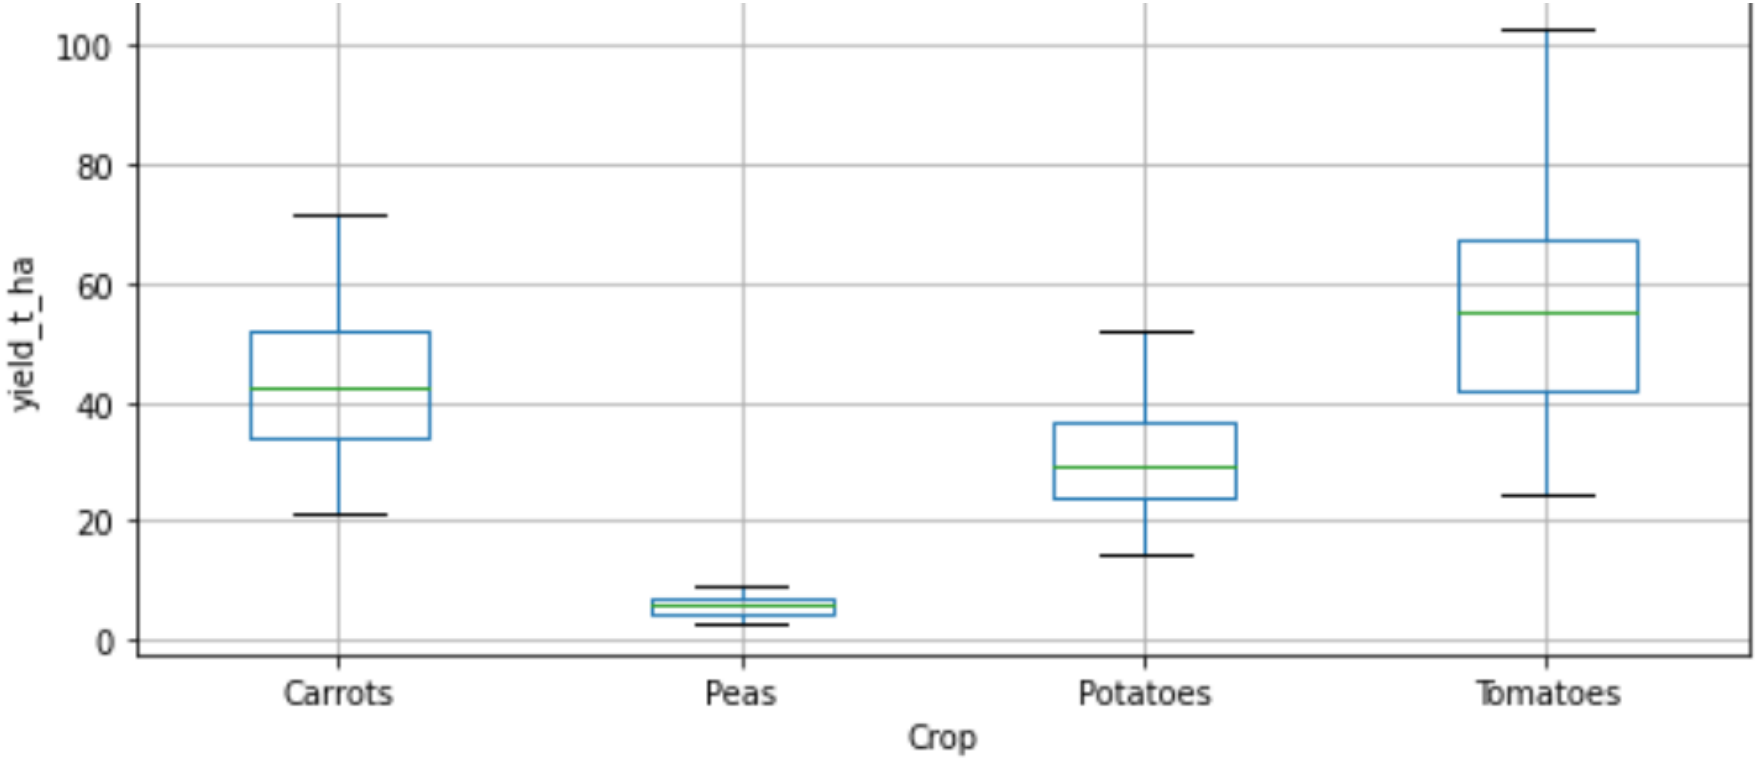

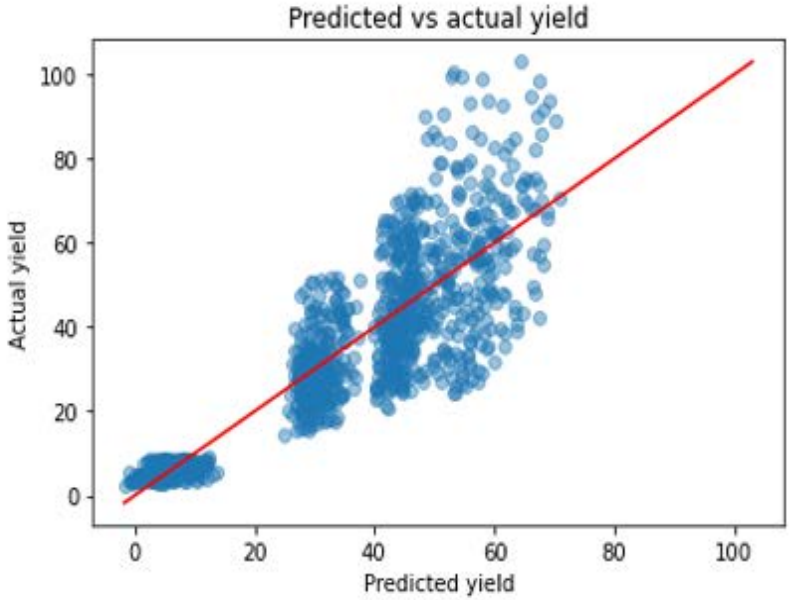

2. OLS Regression

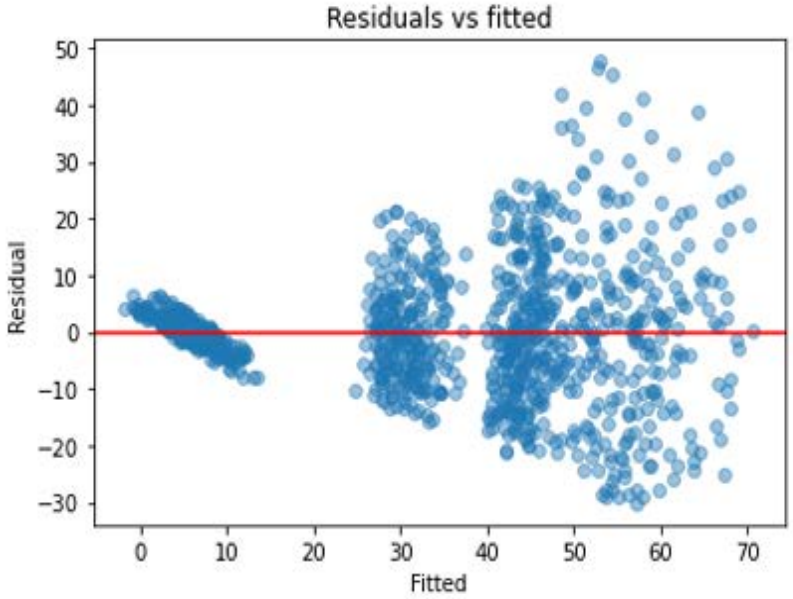

Modelresultat	Værdi
R^2	0.733
Adjusted R^2	0.731
RMSE	11.50
Missing values	5 i mean_temp_c_season
Dubletter	0

Variabel	Koefficient	p-værdi
plant_height_harvest_cm	0.1737	< 0.001
mean_temp_c_season	-0.3507	0.001
days_to_harvest	-0.0100	0.663
nutrient_availability_mean	-4.5535	0.812
Peas vs Carrots	-44.4756	< 0.001
Potatoes vs Carrots	-16.1929	< 0.001
Tomatoes vs Carrots	-9.3443	< 0.001

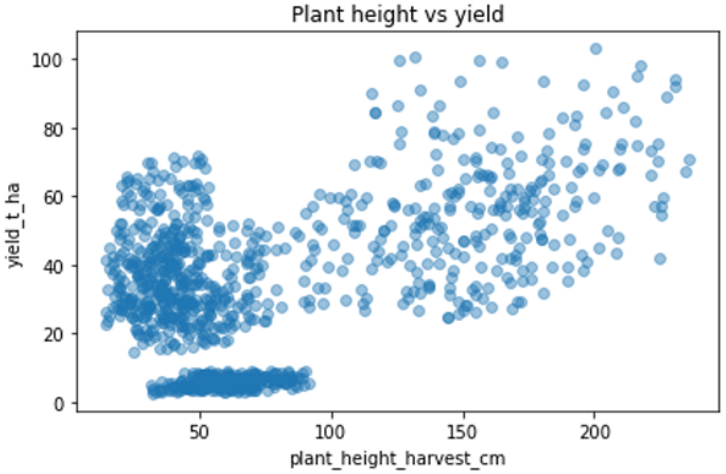

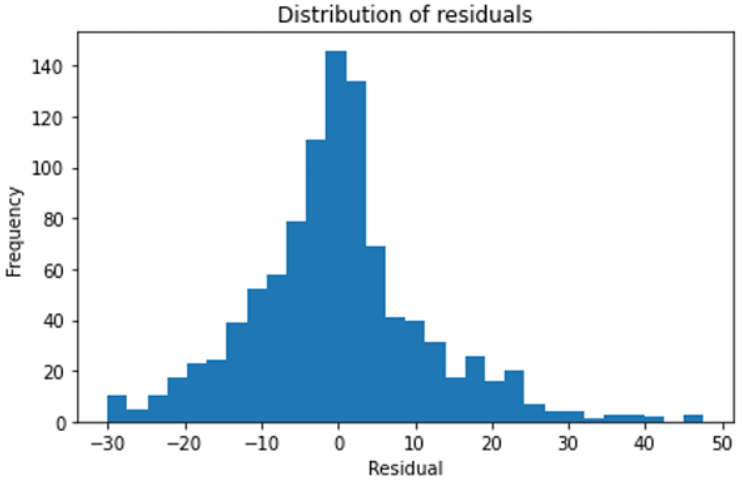

2. OLS Regression, modeldiagnostik

2. OLS Regression, visuelle checks

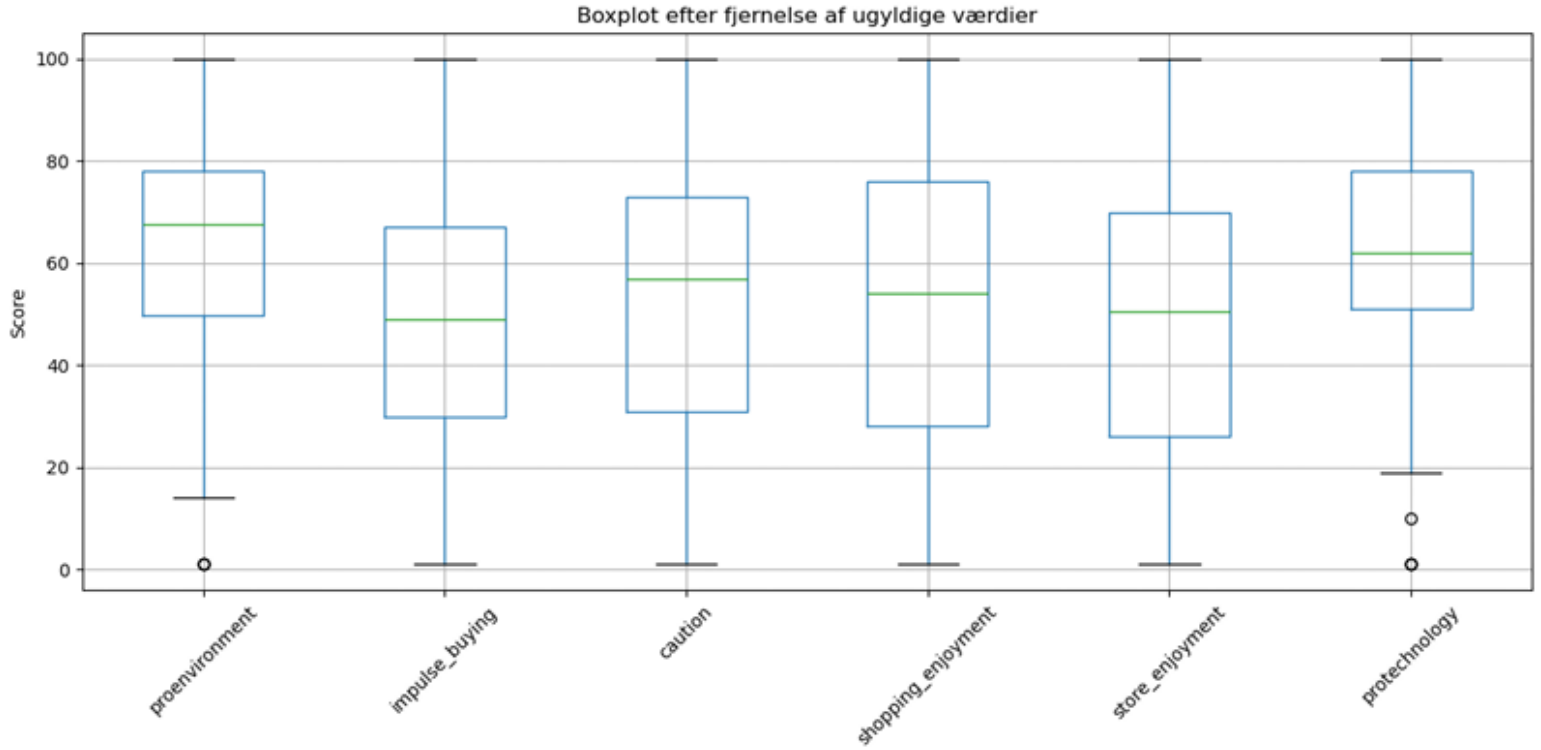

3. Cluster Analysis

Resultat	Værdi
Rensede respondenter	128
Fjernede respondenter	2
Ugyldige værdier på 150	3
Valgt antal clusters	4

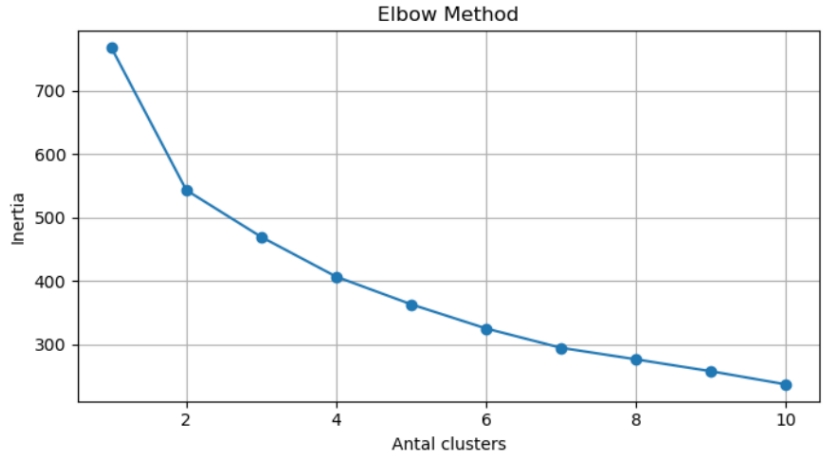

Cluster	Antal	Andel	Profilnavn
1	36	28.1 %	engagerede allround-forbrugere
2	35	27.3 %	shoppingglade digitale forbrugere
3	18	14.1 %	lavt engagerede forbrugere
4	39	30.5 %	miljøbevidste, men butiksfravalgte

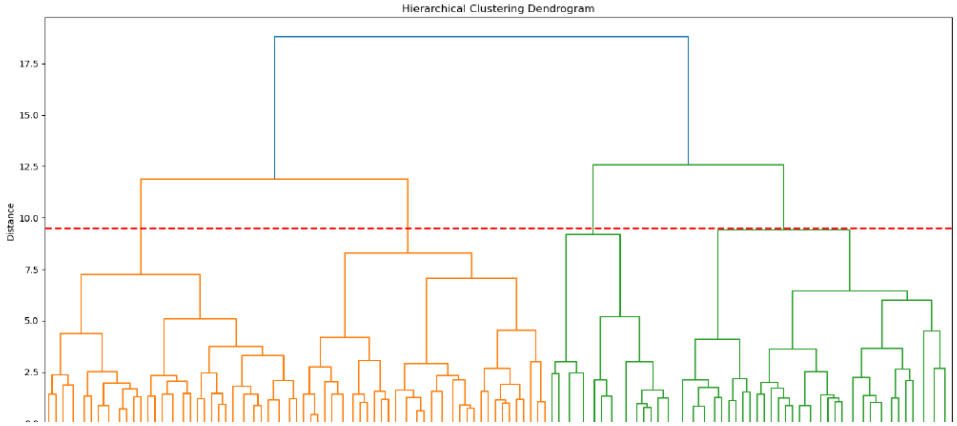

3. Figur 1: boxplot efter rensning

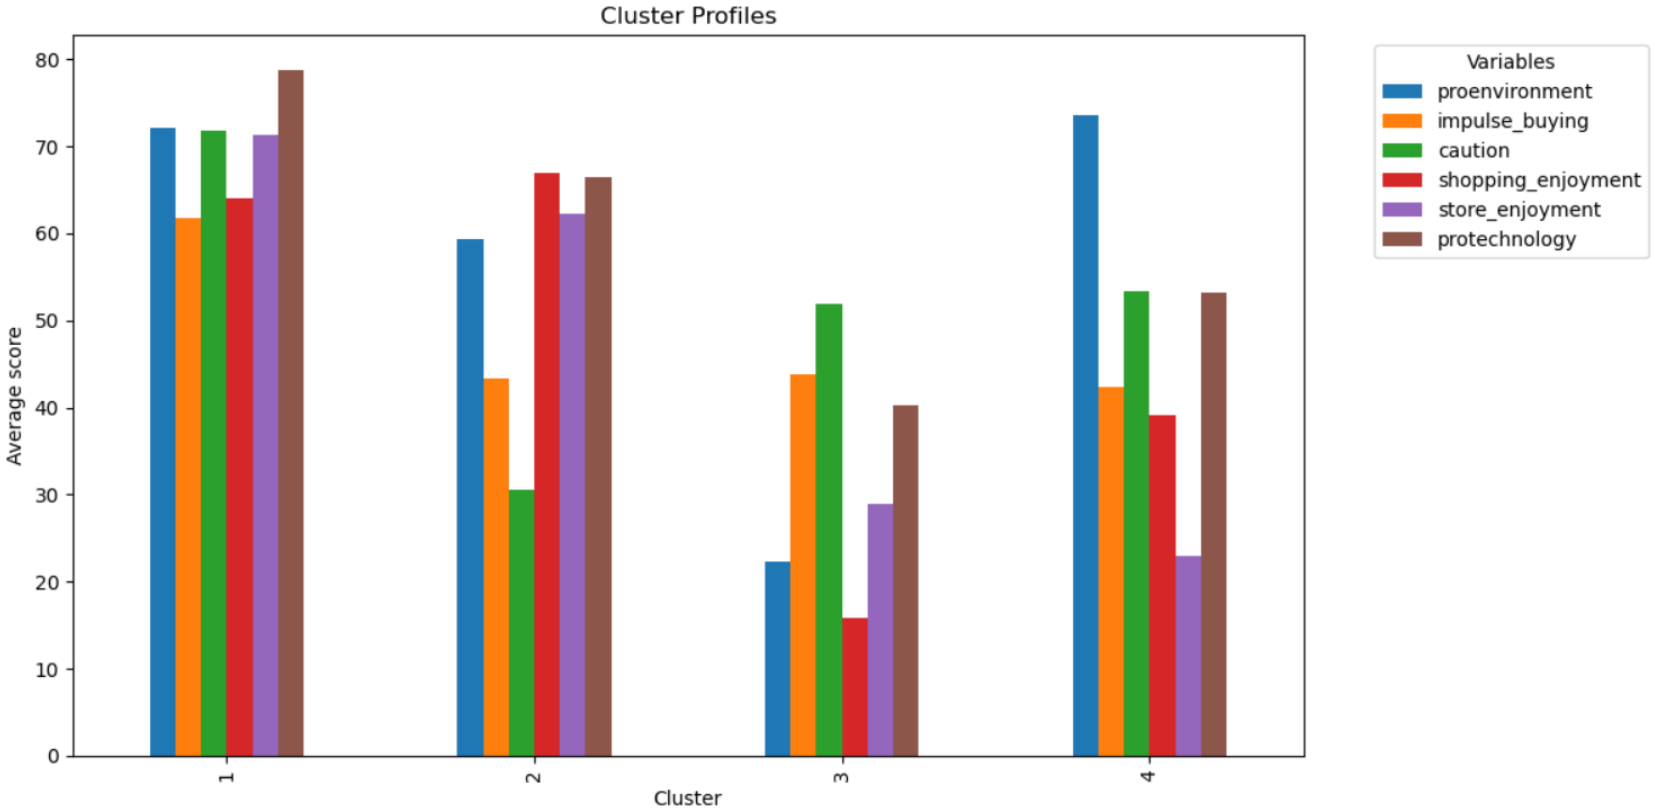

3. Cluster Analysis, valg af clusters

drogram	viser hierarkisk samling	giver et visuelt argument for antal grupper

3. Cluster Analysis, clusterprofiler

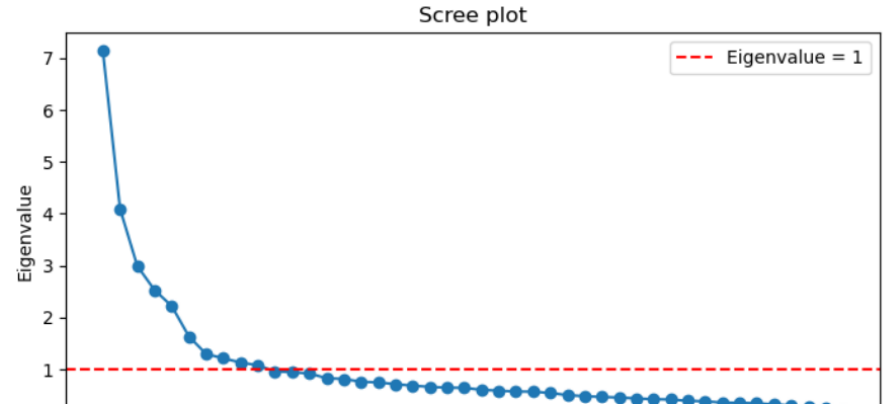

4. Factor Analysis

Test/output	Resultat
KMO	0.839
Bartlett chi-square	6686.29
Bartlett p	0.0
Højeste item-korrelation	0.612

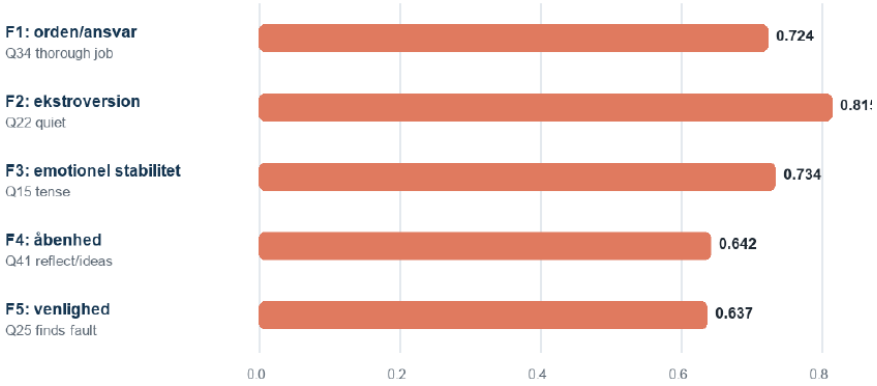

Faktor	Centrale loadings	Label
1	Q34 -0.724, Q19 0.703, Q3 -0.679	orden/ansvar
2	Q22 -0.815, Q2 0.794, Q37 0.731	ekstroversion
3	Q15 -0.734, Q10 0.697, Q20 -0.649	emotionel stabilitet
4	Q41 0.642, Q31 0.628, Q26 0.576	åbenhed/kreativitet
5	Q25 0.637, Q38 0.562, Q23 -0.555	venlighed/samarbejde

relation	0.612	sammenhæng uden perfekt overlap

: scree plot

Bruges til at forklare hvorfor faktornavnene giver mening

4. Factor Analysis, rotated factor loadings
